2. BACKGROUND

Based at the Service SETA Head Office in Parktown, Johannesburg, ICT Department operates an outsourced model to support the ICT operations of the organization nationwide. Historically, the support and maintenance contract of the ICT Infrastructure and ICT Applications System were separated as a result 2 separate Service Providers were contracted for the deliverables. Due to unforeseen operational challenges experienced, ICT Executive Management has resolved to consolidate the ICT Services (Infrastructure and Applications Support and Maintenance) into a single contract.

The ICT Strategy Implementation Plan speaks to the development of a SSIIMS (i.e., Services SETA Integrated Information Management Systems) Roadmap (Fig 1.1) as part of its turnaround strategy to improve the organization's operational efficiencies and effectiveness. The SSIIMS program is premised on the organizational needs to automate and integrate its entire ICT systems environment that supports the business. The program is currently in its second year of implementation and requires a Service Provider who has an extensive and verifiable experience in driving digital turnaround strategies in both private and public institutions.

The successful Service Provider will be expected to embrace and support the SSIIMS program by providing the suitably qualified individuals who will provide necessary ongoing support and maintenance. It is also prudent to highlight that the successfully appointed service provide will be expected to absorb the current resources that are providing support to Service SETA ICT Department. Although not a mandatory requirement, it is advised that the successfully appointed service provider should consider adopting the current professional resources. The recommendation will ensure that there is continuity with minimum or no disruptions to business operations being experienced. Individual monthly budgetary cost of these resources is available upon request.
